SUBJECT INDEX

ACTH
ectopic production of, 403
effect of, on steroid secretion and steroidogenic enzyme activities and expression, 855
ACTH/MSH like peptides
in the treatment of cisplatin neuropathy, 179
Albumin binding globulin
regulation of, secretion by human Sertoli cells in culture, 423
Aldosterone
molecular genetic studies on the biosynthesis of, in humans, 981
Aminoglutethimide
effect of, on aromatase inhibition, 641
Anabolic steroids
a review of their effects on the muscles, possible mechanisms of action and use in athletics, 469
Androgen(s)
tissue, and the endocrine autonomy of breast cancer, 167
Androgen insensitivity syndrome
prenatal prediction of, using Exon 1 polymorphism of the androgen receptor gene, 659
16-Androstenes
GC-MS studies of, 549
Angiotensin II
-directed glomerulosa cell function in fetal adrenal cells, 847
Antiestrogen(s)
ICI 182,780: a new, with clinical potential, 173
mechanisms of growth inhibition by, in human breast and endometrial cancer cells, 117
Antisteroids
modulation of the agonist activity of, by a novel *cis*-acting element, 43
Aromatase
evaluation of the racemate and the enantiomers of a new highly active and selective, inhibitor of the aminoglutethimide type, 641
Exemestane (FCE 24304), a new steroidal, inhibitor, 137
in vitro potency and selectivity of the non-steroidal androgen, inhibitor CGS 16949A compared to steroidal inhibitors in the brain, 281
kinetic properties of, mutants Pro308Phe, Asp309Asn, and Asp309Ala and their interactions with, inhibitors, 693
regulation of human, cytochrome *P*450 gene expression, 923
Avidin-gene
inducibility of, by progesterone is suppressed during estrogen-induced cytodifferentiation, 609

Brain
in vitro potency and selectivity of the non-steroidal androgen aromatase inhibitor CGS 16949A compared to steroidal inhibitors in the, 281
Breast cancer
abnormal estrogen receptor in clinical, 243
aromatization inhibition alone or in combination with GnRH agonists for the treatment of premenopausal, patients, 155
basic fibroblast growth factor (bFGF): mitogenic activity and binding sites in human, 87
clinical, new developments in selection and endocrine treatment of patients, 211
comparison of c-*myc* and HER2/*neu* amplification in human primary, 13
direct stimulation by estrogen of growth factor signal transduction pathways in human, cells, 111
growth factors in, : mitogenesis to transformation, 69
hormonal regulation of c-*erb*B-2 oncogene expression in, cells, 21
4-hydroxyandrostenedione treatment for postmenopausal patients with, 145
inhibition of oestrogen synthesis in postmenopausal women with, 149
plasma-borne specific inhibitor of the proliferation of human estrogen-sensitive, cells, 703
tissue androgens and the endocrine autonomy of, 167

Cancer
hypercalcemia in, 123
modulation of tumour-induced bone resorption by bisphosphonates, 131
Cholesterol
hormonal and stressor-associated changes in porcine adrenocortical, ester hydrolase activity, 725
ontogenesis of, side-chain cleavage activity, in the ovine adrenal during late gestation, 303
regulation of, movement to mitochondrial cytochrome *P*450scc in steroid hormone synthesis, 751
Cortisol
determination of urinary, with three commercial immunoassays, 573
familial and iatrogenic, receptor resistance, 385
metabolism of, by human liver *in vitro*, 713
Cortisol–biotin conjugate
synthesis of a, and evaluation as tracer in an immunoassay for salivary cortisol measurement, 683
CRF
ectopic production of, 403
Cushing's disease
unrestrained production of POMC and its peptide fragments by pituitary corticotroph adenomas in, 379
Cytochrome *P*450
comparison of human fetal hepatic and adrenal, activities, 335
hormone stimulated steroid biosynthesis in granulosa cells studied with a fluorogenic probe for, 479
immunochemical specificity of placental NADPH, reductase in neoplastic and non-neoplastic human tissue, 515
in guinea pig adrenal, 863
modes of regulation of liver-specific steroid metabolizing, 1055
participation of a, enzyme from the 2C subfamily in progesterone 21-hydroxylation in sheep liver, 591
steroid metabolism by constitutive, 1023
Cytokines
potential relevance of, to ovarian physiology, 439
Cytoskeleton
role of, in the regulation of steroidogenesis, 769

Danazol
induction of progesterone receptor by, in cultured cancer cells and the rat uterus, 289
1,25-Dihydroxyvitamin D_3
characterization of human, receptor antipeptide antibodies, 649
cDNA expression
chimeric, and site directed mutagenesis studies of CYP2A1 and CYP2A2, 1037
DNA
antiestrogen-liganded estrogen receptor interaction with estrogen responsive element, *in vitro*, 249
comparison of cAMP-responsive, sequences and their binding proteins, 931
magnetic, affinity purification of ecdysteroid receptor, 629

Endometrial cancer
growth-promoting effects of progesterone in a human, cell line (Ishikawa-Var I), 635
mechanisms of growth inhibition by antiestrogens and progestins in human breast and, cells, 117
Epitestosterone
a potent competitive inhibitor of C_{21}-steroid side chain cleavage in the testis, 721
ERG 11 gene
molecular genetic analysis of the, in *Saccharomyces cerevisiae*, 1107
Estradiol
modulatory actions of, on phorbol ester-stimulated LH secretion from cultured rat pituitary cells, 619
17β-Estradiol dehydrogenase
purification, characterization and subcellular localization of membrane-bound, of porcine endometrial cells, 1089
Estrogen(s)
direct stimulation by, of growth factor signal transduction pathways in human breast cancer cells, 111
Estrogen responsive element
antiestrogen-liganded estrogen receptor interaction with, DNA *in vitro*, 249

Gene(s)
analysis of the duplicated human C4/P450c21/X, cluster, 961
bovine CYP17 and CYP11A and human CYP21B, 931
promoter elements of the mouse 21-hydroxylase (Cyp-21), 937
steroids and growth promoting factors in the regulation of expression of, 63
Gene expression
changes in, during senescence of adrenocortical cells in culture, 951
effect of ACTH on steroid secretion and steroidogenic enzyme activities and, 855
hormonal regulation of steroidogenic enzyme, in Leydig cells, 895
of 3β-hydroxysteroid dehydrogenase/5-ene-4-ene isomerase enzymes, 805
regulation of human aromatase cytochrome *P*450, 923
regulation of, of enzymes controlling aldosterone synthesis in rat adrenal, 837
role of cytokines in the regulation of Leydig cell *P*450c17, 907
Glucocorticoid(s)
-dependent hypertension, 409
Glucuronosyltransferases
steroid UDP, 1099
GnRH
aromatization inhibition alone or in combination with, agonists for the treatment of premenopausal breast cancer patients, 155
Growth factor(s)
basic fibroblast, : mitogenic activity and binding sites in human breast cancer, 87
direct stimulation by estrogen of, signal transduction pathways in human breast cancer cells, 111
in breast cancer: mitogenesis to transformation, 69
in the regulation of expression of genes and gene networks, 63
Growth hormone
mechanism of, regulation of sexually dimorphic *P*450 enzymes in rat liver, 1045

4-Hydroxyandrostenedione
treatment for postmenopausal patients with breast cancer, 145
25-Hydroxydihydrotachysterol
synthesis and biological activity of, 363
21-Hydroxylase
promoter elements of the mouse, (Cyp-21) gene involved in cell-selective and cAMP-dependent gene expression, 937
17α-Hydroxylase/17,20-lyase deficiency
molecular basis of, 973
11β-Hydroxylation
of 17α-21-dihydroxypregna-1,4-diene-3,20-dione 17-acetate in dependence of the inducer structure, 543
molecular biology of, 827
18-Hydroxylation
in the Y-1 adrenal cell line: response to ACTH and to culture conditions, 535
3α-Hydroxysteroid dehydrogenase
molecular cloning of multiple, related enzymes from rat liver, lung and kidney, 1083
purification and properties of human hepatic, 343
structure, function and tissue-specific gene expression of, 805
3β-Hydroxysteroid dehydrogenase
ontogeny and subcellular localization of, in the human and rat adrenal, ovary and testis, 451
regulation by dexamethasone of the, activity in adult rat Leydig cells, 565
11β-Hydroxysteroid dehydrogenase
molecular biology of, enzymes, 827
17β-Hydroxysteroid dehydrogenase
deficiency: an inherited form of male pseudohermaphroditism, 989
Hypothalamo–pituitary–gonadal system
actions of acetyl-L-carnitine on the, in female rats, 351

Leydig cells
control of steroidogenesis in, 445
effects of serum and serum lipoproteins on testosterone production by rat Leydig cells *in vitro*, 581
hormonal regulation of steroidogenic enzyme gene expression in, 895

regulation by dexamethasone of the 3β-hydroxysteroid dehydrogenase activity in adult rat, 565
role of cytokines in the regulation of, *P*450c17 gene expression, 907
Leydig tumor
control of steroidogenesis in MA-10 mouse, cells, 319
regulation of expression of 3β-hydroxysteroid dehydrogenase is mediated by cAMP in H540 rat, cells, 915
Liarozole (R 75 251)
an antitumoral agent which inhibits retinoic acid breakdown, 197
Lipoprotein
receptors and steroidogenesis, 395

Mammary adenocarcinomas
high frequency of, in metallothionein promoter-human growth hormone transgenic mice, 237
Mammary cancer cells
regulation of androgen receptor messenger ribonucleic acid and protein level by steroid hormones in human, 599
Male pseudohermaphroditism
17β-hydroxysteroid dehydrogenase: an inherited form of, 989
MCF-7 cells
covalent labeling of proteins by 17β-estradiol, retinoic acid, and progesterone in the human breast cancer, 489
tamoxifen induced changes in, of human breast cancer, 189
mRNA
regulation of androgen receptor, level by steroid hormones in human mammary cancer cells, 599

Oncogene(s)
c-*erb*B-2
hormonal regulation in, expression in breast cancer cells, 21
receptor, in tumor cells, 1
c-*myc*
amplification in human primary breast cancer, 13
*erb*B-2
and its ligands in growth control of malignant breast epithelium, 229
HER2/*neu*
amplification in human primary breast cancer, 13
neu/*erb*B-2
signal transduction by the, a potential target for anti-tumor therapy, 95
ras + *myc*
-induced mouse prostate carcinomas, 79
Wnt
gene family in tumorigenesis and in normal development, 9
transformed granulosa cells as a model system for the study of steroidogenic processes, 875

Peptide hormones
novel antitumor, and their effect on signal transduction, 105
P-450s
alteration of the substrate specificity of mouse 2A, by the identity of residue-209, 1031
P-450scc
regulation in pig granulosa cells, 869
Phorbol ester
effect of estradiol and progesterone on, -stimulated LH secretion from cultured rat pituitary cells, 619
Pituitary tumor cell line
effects of retinoic acid on, 263
Progesterone
adrenergic influence on, metabolism in the rat ovary, 885
growth-promoting effects of, in a human endometrial cancer cell line (Ishikawa-Var I), 635
modulatory actions of, on phorbol ester-stimulated LH secretion from cultured rat pituitary cells, 619
Progesterone antagonists
the antitumor potency of, is due to their differentiation potential, 203

Progestin(s)
-induced fatty acid synthetase in human mammary tumors, 223
mechanisms of growth inhibition by, in human breast and endometrial cancer cells, 117
Prostate carcinoma
androgen sensitivity and gene expression in *ras* + *myc*-induced mouse, 79
Prostatitis
soy of dietary source plays a preventive role against the pathogenesis of, in rats, 557

Receptor(s)
androgen
domain functions of the, 37
prenatal prediction of androgen insensitivity syndrome using Exon 1 polymorphism of the, gene, 659
angiotensin II
characterization and coupling of, subtypes in cultured bovine adrenal fasciculata cells, 271
1,25-dihydroxyvitamin D_3
characterization of human, antipeptide antibodies, 649
ecdysteroid
magnetic DNA affinity purification of, 629
estrogen(s)
aberrant, species in human meningioma tissue, 57
immunohistochemical detection of human, with region D-specific anti-peptide antibodies, 311
interaction of, with DP-TAT-59, an active metabolite of new triphenylethylene derivative (TAT-59), 507
interaction of, with estrogen responsive element DNA *in vitro*, 249
glucocorticoid, 389
progesterone
induction of, by Danazol in cultured cancer cells and the rat uterus, 289
somatostatin
in human cancer: incidence, characteristics, functional correlates and clinical implications, 27
Retinoic acid
covalent labeling of proteins by, in the human breast cancer cell lines MCF-7 and MCF-7/Adr^R, 489
effect of liarozole (R 75 251) on, 197
effects of, on estrogen- and thyroid hormone-induced growth in a newly established rat pituitary tumor cell line, 263

Sertoli germ cells
interactions in the human testis, 419
Sex hormone binding globulin
steroidal and non-steroidal factors in plasma, regulation, 431
Sex steroid hormones
cartilage responsiveness to, 415
Somatostatin
receptor imaging in the diagnosis and treatment of neuroendocrine tumors, 185
Steroids(s)
current research on, metabolism: transition from biochemistry to molecular-cell biology, 745
enzymes involved in, reduction in vertebrates, invertebrates and procaryonts, 665
11β-hydroxylation by a fungal microsomal cytochrome *P*450, 1117
Steroid-1-dehydrogenase
of *Rhodococcus erythropolis*: purification and N-terminal amino acid sequence, 297
Steroid enzyme-linked immunoassays
biotin-hydrazide derivatives for the development of, 523
Steroid hormone(s)
interplay of, receptors and transcription factors on the mouse mammary tumor virus promoter, 365
regulation of androgen receptor messenger ribonucleic acid and protein level by, in human mammary cancer cells, 599
Steroidogenesis
extraglandular hormonal, in aged rats, 1095
Steroidogenic enzymes
structure, function, and role in regulation of steroid hormone biosynthesis of, 779

Tamoxifen
changes induced by, in MCF-7 human breast cancer cells, 189
Testosterone
effects of serum and serum lipoproteins on, production by adult rat Leydig cells *in vitro*, 581
Transcription factors
interplay of steroid hormone receptors and, on the mouse mammary tumor virus promoter, 365

Vitamin D
characterization and regulation of, hydroxylases, 1073
Vitamin D_3
isolation and identification of, in *Solanum malacoxylon* incubated with ruminal fluid, 677

Zymosterol
a simple method for the isolation of, from a sterol mutant of *Saccharomyces cerevisiae*, 741

We wish to express our deep thanks to the following persons for their kind collaboration in reviewing papers for the *The Journal of Steroid Biochemisry and Molecular Biology*: Drs J. BARTLETT, Edinburgh, Scotland; A. BELANGER, Quebec, Canada; J. CARLSTEDT-DUKE, Huddinge, Sweden; K. C. CHENG, New York, U.S.A.; C. FRETER, Washington, U.S.A.; M. GOVINDAN, Quebec, Canada; R. A. HAWKINS, Edinburgh, Scotland; L. KREY, New York, U.S.A.; L. A. MILLER, Denver, U.S.A.; C. MONDER, New York, U.S.A.; J. SAEZ, Lyon, France; B. SCHACHTER, New York, U.S.A.; J. SIMARD, Quebec, Canada; and V. LUU-THE, Quebec, Canada.
